

MUST-KNOW FOR EVERY C# DEVELOPER

Top 5 LINQ Questions Asked in .NET Interviews

What is LINQ?

- Language Integrated Query
- Used to query collections, databases, XML
- Works with IEnumerable & IQueryable

Difference between IEnumerable & IQueryable?

- IEnumerable → In-memory execution
- IQueryable → Query executed at database level
- Performance impact matters

STRATEGY 3

What is Deferred Execution in LINQ?

- Query runs only when iterated
- Improves performance
- Can cause unexpected results if not understood

Difference between Select() & SelectMany()?

- Select → One-to-one projection
- SelectMany → Flattens nested collections
- Commonly asked with real examples

STRATEGY 5

**First(),
FirstOrDefault(),
Single(),
SingleOrDefault()?**

- Know when exceptions occur
- Critical for writing safe production code
- Interviewers love edge cases ⚠

BE HONEST. KEEP IMPROVING.
